**Superlative *ever*:**  
**A cross-linguistic lexically anchored structural borrowing**

Superlative-*ever*, (1), is borrowed into many languages, including Dutch, French, German, and Spanish. These languages only borrow *ever* as an emphatic superlative marker, not in other functions, (2).

- (1) Ik was waarschijnlijk de meest rare patiënt ever.  
*I was probably the most strange patient ever*  
'I was probably the strangest patient ever.' [nl, nlTenTen20]
- (2) \*Würdest du ever ...? (Androutsopoulos 1998:542)  
*Would you ever ...? [de, constructed]*

I consider data from internet corpora, adding introspective judgments where needed. The corpora of the considered languages contain complete English noun phrases with superlative-*ever*, as well as fully native noun phrases with an analogous native superlative domain widener. We also find mixed noun phrases, (3).

- (3) worst pesadilla ever  
*worst nightmare ever [Spanish, esTenTen18]*

As emphatic particle that can also be intonationally separated, superlative-*ever* is a plausible candidate for borrowing (Matras 2011). However, I will argue that *ever* is not borrowed as a single lexical item but within a construction that partially overlaps between English and the target language. This provides an explanation for the commonalities and differences in *ever*-borrowing in the considered languages. I will model this in an HPSG-adaptation of the frameworks in Hoeder (2012) and Wiese (2021).
